## GOALS

Passionate about technology since I was a child. I found myself in computing and I intend to contribute to data management in the most diverse areas of systems development

## SKILLS

Systems administration  
Process automation  
Database management  
Data extraction, processing and analysis  
Team work

## LANGUAGES

English | Advanced  
Spanish | Basic

## WORK HISTORY

### Data Analyst O&M

Dec 2022 until now

Athon

I work in data management for Athon's photovoltaic plants, adding intelligence to the collection and analysis of our projects. Responsible for structuring the O&M database, managing ETL processes and generating data visualization.

### Systems Developer

Sep 2021 - Dec 2022

Athon

I worked on the development of PowerRev, a web platform that manages invoices and energy management for generating companies or large consumers. Contributed to several areas of web development, using Flask, Node.js, Docker, MySQL and AWS

### Communication Director

Mar 2020 - Nov 2021

Academic Center of Electrical and Computer Engineering (CEE)

I contributed to structuring the 100% online dissemination of the academic center's projects, work that was done organically. I collaborated for 3 years in organizing the Academic Week of Electrical and Computer Engineering, SEnEC

## EDUCATION

### Electrical Engineering with an emphasis on Computing

Jan 2018 - Dec 2023

Escola Politécnica - Universidade de São Paulo

I was a student representative in the Computing and Digital Systems department and director of men's volleyball.
